Jane Doe

Senior Backend Engineer (Python & LLMs) | Hamburg, Germany | jane.doe@example.com
(Fictional demo CV. The person, companies and university do not exist.)

Summary

Backend engineer with 7 years of professional experience in Python. For the last three years I have built LLM features in production, including a customer-facing retrieval-augmented (RAG) assistant that answers questions from product documentation.

Experience

Senior Backend Engineer, Cargoline Digital GmbH, Hamburg | 01/2022 - today

- Designed and built REST APIs in Python with FastAPI and PostgreSQL for a freight booking platform used by 300 business customers.
- Built a customer-facing RAG assistant over 6,000 help articles with pgvector and an LLM API; it now answers 40% of customer questions without a support agent.
- Created an evaluation set of 300 real customer questions and a weekly report on answer quality.
- Containerised all services with Docker and run them on Kubernetes on AWS (EKS), deployed with GitLab CI/CD.
- Mentored three engineers and led the team's API design reviews.

Backend Developer, Brightquay Software GmbH, Bremen | 09/2019 - 12/2021

- Developed Django REST APIs and PostgreSQL databases for logistics customers.
- Wrote SQL reports and data migrations; introduced automated tests with pytest.
- Took part in customer workshops to turn requirements into API designs.

Education

M.Sc. Computer Science, Example Technical University, Hamburg | 2017 - 2019
B.Sc. Computer Science, Example Technical University, Hamburg | 2014 - 2017

Skills

Languages: Python, SQL, TypeScript
Frameworks: FastAPI, Django, pytest
Data: PostgreSQL, pgvector, Redis
Cloud & DevOps: Docker, Kubernetes, AWS, GitLab CI/CD
AI: LLM APIs, retrieval-augmented generation (RAG), embeddings, evaluation of LLM answers

Languages

English: fluent (C2)
German: fluent (C1)

Volunteering

Maintains the website of a local rowing club.
