## Jordan Example

Backend & AI Engineer | Hamburg, Germany | jordan.example@example.com
(Fictional demo CV. The person, companies and school do not exist.)

## Summary

Backend engineer with 5 years of professional experience building Python services and REST APIs. For the last two years I have built LLM features in production, including a retrieval-augmented (RAG) search assistant used by the internal support team.

## Experience

Backend Engineer, Harborline Systems GmbH, Hamburg | 03/2022 - today
- Built and run REST APIs in Python with FastAPI and PostgreSQL for a shipment-tracking platform.
- Designed a RAG search assistant over 4,000 support articles with an open-source embedding model and pgvector; added an evaluation set of 150 real support questions to measure answer quality.
- Containerised all services with Docker and deployed them to Microsoft Azure (App Service, Azure Database for PostgreSQL) with GitHub Actions CI/CD.
- Wrote automated tests with pytest; raised test coverage of the core API from 40% to 85%.
- Mentored two junior developers and ran the team's weekly code reviews.

Junior Software Developer, Quillbyte Software GmbH, Bremen | 09/2019 - 02/2022
- Developed Django web applications and internal REST APIs for small retail customers.
- Maintained PostgreSQL databases and wrote data migration scripts in Python.
- Took part in customer workshops to turn feature requests into user stories.

## Education

B.Sc. Computer Science, Example University of Applied Sciences, Bremen | 2015 - 2019
Thesis: Comparing caching strategies for read-heavy REST APIs.

## Skills

Languages: Python, SQL, basic TypeScript
Frameworks: FastAPI, Django, pytest
Data: PostgreSQL, pgvector, Redis
Cloud & DevOps: Docker, Microsoft Azure, GitHub Actions, Git
AI: LLM APIs, retrieval-augmented generation (RAG), embeddings, prompt design, answer evaluation

## Languages

English: fluent (C1)
German: basic (A2)
